## Make an advent calendar yourself: share the joy

### You will need...

- One roll of d-c-fix<sup>®</sup> Uni matt white
- One roll of d-c-fix<sup>®</sup> Uni matt black
- One mini chest of draws (e.g. Moppe from Ikea)
- d-c-fix<sup>®</sup> Handcrafting kit with smoothing blade and cutter knife
- Scissors
- Pencil

#### Step 1

Take the measuring tape and measure the front side of the drawer so you will know how large your numbers and letters can be.

#### Step 2

To make sure no pencil lines will be visible on the final result, write the numbers and letters on the backing paper for the white and black film. Important: the numbers/letters must be inscribed back-to-front. Then cut them out with the scissors. For your creativity the sky is the limit: you can, for example, cut shapes out of black film and then place on it a number cut out from white sticky film.

#### Step 3

Peel off the backing of the film and stick the numbers on the appropriate drawers. Press everything smooth in strokes with a smoothing blade.

#### Step 4

You can easily cut off any film extending past the edges using a cutter knife.
