Your eye-catcher: bedside table in gold

You will need...

- One roll of whitewood
- One roll of gold
- d-c-fix[®] Handcrafting kit with smoothing blade and cutter knife
- Scissors
- Pencil

Step 1

Take measurements of the bedside table and draw the dimensions with a 3 cm wide crop margin on the adhesive film. Cut out the marked surface and then peel off the backing paper from the adhesive film.

Step 2

Place the front panel for the draw carefully on the stick side of the film.

Step 3

Press down the film, stroking from the centre outwards using the smoothing blade.

Step 4

Cut away the surplus film from the edges.

Step 5

Repeat the above steps for the sides and top of your bedside table. Make sure that the wood grain always runs in the same direction.

Step 6

Lastly, cut out a large circle from your golden decoration film and stick it on the surface of the front panels of the drawers.
