

Upcycling idea for wine drinkers - side table with d-c-fix®

You will need...

- A roll of d-c-fix® Rio
- Processing set d-c-fix® with squeegee and cutter
- 2-3 round wooden boards
- Hole Drill
- Several empty bottles
- Measuring tape
- Pencil

Step 1

First take the hole drill and the wooden plate. Make sure that the hole drill is slightly smaller than the widest point of the bottle. Now drill at least 3 holes staggered in the wooden plate. For a rectangular wooden plate 4 holes are recommended.

Step 2

Now it's all about the look: take the d-c-fix® adhesive film and peel off a piece of the backing paper. Attach the adhesive film to the wooden board. Use a squeegee to apply the adhesive to the surface to avoid bubbles.

Step 3

Then cut out the holes with the cutter and remove the protruding foil at the edge of the plate. For this you also use the cutter.

Step 4

And now for the last step: Put the wine bottles into the holes and your individual coffee table is ready!
