## Mirror, mirror on the wall: your colorful DIY mirror is the fairest of them all

### You will need...

- One roll of d-c-fix<sup>®</sup> in Ribbeck Oak
- One roll of d-c-fix<sup>®</sup> plain lacquer in Banana Yellow
- One roll of d-c-fix<sup>®</sup> plain lacquer in Orange
- One d-c-fix<sup>®</sup> tool kit with smoother and cutter knife
- Scissors
- Pencil
- Double-sided adhesive tape
  
- Round mirror
- Round wooden board (approx. 40 cm in diameter)
- Gold chain (approx. 30 cm)
- Two gold screws
- Cordless screwdriver
- Cutter-pliers

#### Step 1

So, let's get going. First, transfer the outline of the wooden board to the back of the three adhesive films.

#### Step 2

Take the Ribbeck Oak film, and cut out the complete circle. In both the Banana Yellow film and Orange films, cut out only a 120° pie section of the entire circle.

#### Step 3

Now, remove the backing paper from the Ribbeck Oak wood-effect film, and use the smoother to press it onto the wooden board. Then apply the two circle sections of the two colored films onto the board.

#### Step 4

Next, use double-sided adhesive tape to affix the round mirror onto the colorful film-coated wooden board.

#### Step 5

Finally, mark the two location points for the mounting screws on the left and right, for example centered on the edge of the wooden circle. Then see how long the chain needs to be for your mirror, and insert the screws through the chain links accordingly.

#### Step 6

Use the screwdriver to secure the two screws firmly into the

wood, and the cutter-pliers to cut off any excess chain.
