

Make blue: Chic DIY wardrobe in a wood effect

You will need...

- Two rolls of d-c-fix® Quadro Night Blue
- One d-c-fix® tool kit with smoother and cutter knife
- A large wooden board
- Screws
- Cordless screwdriver
- Clothes hooks
- Scissors
- Pencil
- Measuring tape

Step 1

Consider whether you want to allow the wood grain of the adhesive film to run vertically or horizontally – then cut the foil strips – including a bit of excess for gluing the edges – to the foil.

Step 2

Then pull out some of the backing paper and attach the film to the top edge of the wood plate – and apply the adhesive foil to the slab with the doctor blade.

Step 3

When you have completely pasted the wood plate, draw a fine line in the top third with a pencil and tape measure and mark crosses for the positioning of your coat hooks. Make sure that the distances between your hooks are the same.

Step 4

Now screw your clothes hooks to the coated wooden plate using the screwdriver – and your DIY wardrobe is ready!
