**Next stop Brooklyn: the old kitchen island looks stunning in brick look with the new Ceramics Tisa wall covering from d-c-home<sup>®</sup>.**

## You will need...

- Ceramics Tisa wall covering
- Ceramics adhesive
- Brush
- Ruler
- Cutter knife
- Cleaning cloth

### Step 1

A clean job is everything. That's why getting my working materials ready is always the first thing I do. Then I make the surface even and remove all the dirt. Off you go!

### Step 2

Then cover the areas of the kitchen island to which the foil is to be applied with wall covering adhesive. Ideally use a brush so that the adhesive can be spread evenly.

### Step 3

Now carefully attach the first width beneath the worktop.

### Step 4

Smooth the width from the top over the centre and outwards. Use the smoother to apply equal pressure so that it's completely even. Perfect!

### Step 5

Carefully cut off the excess foil on the edges using a cutter. Now go back to step 3 and cover the other sides of the kitchen unit. It's as simple as can be! The kitchen island in Brooklyn loft look is complete – tataaaa! This used brick look is simply stunning!
