

## Plant pot in a fashionable industrial style

### You will need...

- One roll of d-c-fix® Segovia
- d-c-fix® application kit with smoothing blade and cutter knife
- MDF panels, 1 cm thick
- 1x 30×60 cm, 2x 60×18 cm and 2x 28×18 cm
- 4 hairpin table legs
- UHU Express wood glue
- Screws and screwdriver
- Masking tape
- Scissors
- Pencil

#### Step 1

Place the panels on the base panel and glue them to each other. First, glue the long sides to the base panel, then glue the short sides into place.

#### Step 2

Fix the sides using masking tape so that the glue can dry.

#### Step 3

Trace the side dimensions on the back of the adhesive film, cut these out, and then attach the film to the plant pot using the smoothing blade.

#### Step 4

Finally, attach the hairpin table legs to the underside of the box using small screws and a screwdriver.
