

A rustic wooden look for your living room furniture!

You will need...

- One roll of d-c-fix[®] Sanremo Oak sepia
- d-c-fix[®] application kit with smoothing blade and cutter knife
- Scissors
- Pencil
- Tape measure

Step 1

Lay out your materials and thoroughly clean the surface of the table.

Step 2

Transfer the measurements of the table onto the backing paper of the adhesive film and cut it out, leaving approximately 3 cm extra.

Step 3

Peel off part of the backing paper and apply the wood-effect film to the edges of the table. Then press down the film using the smoothing blade.

Step 4

Using your thumbs, press the film under the edges and then pass the smoothing blade over the table once again. You can trim off any excess film using the cutter knife.
