click TILE

Rapid and attractive protection

The range of **d-c-floor® click TILE** floor tiles provides practical assistance in both interior and exterior areas. Thanks to their click attachment system, the tiles can be laid extremely simply and in lightning-quick fashion. Their water drainage effect allows them to function as a protective surface with slip reducing characteristics when placed over a damp undersurface, for example in camping applications, in the garden, beside the swimming pool or in washrooms.

These tiles are resistant to high temperatures and UV radiation, and also offer a decorative alternative for the renovation of worn surfaces on balconies and terraces.

- Click system: easy and quick to apply
- Extremely durable: up to 110 to/sqm
- Water drainage effect
- Resistant to fluctuations in temperature: -30°C till +70°C
- 5 years manufacturer's guarantee
