

# Tile Art

## A perfect combination of design and function

The new range of lightweight wall tiles is called **d-c-wall® Tile Art**. As a do-it-yourself product, absolutely anyone can use it to tile walls in just a few simple steps, without power tools and without making a mess. It can adorn walls in kitchens, entrance halls and bathrooms. Each tile is made of vinyl foam and features an exceptionally robust and hard-wearing surface.

**d-c-wall® Tile Art** is almost indistinguishable from genuine wall tiles in look and feel – an effect reinforced by the micro V-grooves that occur naturally with tiles. Its low weight and tongue-and-groove system make it incredibly easy to apply. This makes **d-c-wall® Tile Art** an easy way for you to enhance your walls and give them your own personal touch.

**MARBLE-LOOK**  
tiles add  
natural elegance  
to walls

**CONCRETE-LOOK**  
tiles evoke  
modern city  
living

Wall tiles with a  
**NATURAL WOOD**  
LOOK will add

Pearl Grey 270-2008

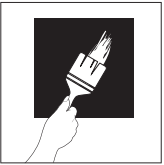

Detailed Instructions

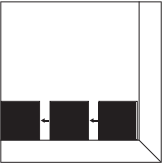

1 Tools required: ruler, cutting knife, pencil, tape measure, brush, adhesive

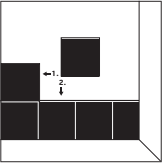

2 The application surface must be stable, fully dry, clean, level and free of dust, oil and grease. Any unevenness can be rectified using filler.

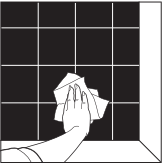

3 Apply a commercially available dispersion adhesive evenly and, if possible, so that it covers the entire rear side of the wall tiles.

4 Glue the wall tiles to the wall. Slide the next wall tile from right to left firmly into the tongue of the previous wall tile. Make sure that the wall tiles are flush with each other, both above and below.

5 Slide the wall tile from right to left firmly into the tongue of the previous tile. Then slide the wall tile downward firmly into the tongue of the wall tile below.

6 Clean the wall tiles with water and a mild cleaning agent. More detailed cleaning information can be found in the separate care instructions.
